Office Action Summary

Art Unit: 1772

1. Applicant's election without traverse of group VI, claims 19-21 in Paper No. 7 is acknowledged.

2. Claims under examination now are 19 and 22-35.

3. The following is a quotation of the second paragraph of 35 U.S.C. 112:

The specification shall conclude with one or more claims particularly pointing out and distinctly claiming the subject matter which the applicant regards as his invention.

Claim 22 is rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention.

Claim 22 is indefinite in reciting a resin as an adhesive composition. Resin is one of few other ingredients of the adhesive composition.

4. Claim 29 is objected to because of the following informalities:

"289" in this claim should be "28". Appropriate correction is required.

5. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

6. Claims 19 and 22-35 are rejected under 35 U.S.C. 102(b) as being anticipated by Khan et al (WO 00/78699).

Khan discloses a solid composite containing a particulate or fibrous material and a resin, wherein the resin is obtained from an oxidative cleavage product formed by oxidative cleavage of an unsaturated plant or animal oil. Ozonolysis of cashew nut shell liquid (CNSL) is given on

Art Unit: 1772

page 17, line 25 to page 18, line 14. Use of CNSL aldehyde as an adhesive and preparation of wood panels are set forth in examples 12E and 12F (pages 19 and 20).

Claims 19 and 22-35 therefore lack novelty.

7. The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

This application currently names joint inventors. In considering patentability of the claims under 35 U.S.C. 103(a), the examiner presumes that the subject matter of the various claims was commonly owned at the time any inventions covered therein were made absent any evidence to the contrary. Applicant is advised of the obligation under 37 CFR 1.56 to point out the inventor and invention dates of each claim that was not commonly owned at the time a later invention was made in order for the examiner to consider the applicability of 35 U.S.C. 103(c) and potential 35 U.S.C. 102(e), (f) or (g) prior art under 35 U.S.C. 103(a).

8. Claims 19 and 22-35 are rejected under 35 U.S.C. 103(a) as being unpatentable over Khan et al (WO 00/78699).

Disclosure of Khan is presented in item 6 above. It would have been obvious to follow teachings of Khan and arrived at the claimed invention.

9. Any inquiry concerning this communication or earlier communications from the examiner should be directed to U.K. Rajguru whose telephone number is 703-308-3224. The examiner can normally be reached on Monday-Friday from 9:30 am to 6:00 pm.
